

Hughes Brothers Service Station

GASOLINE REMEDIATION PROJECT

Site Location: Wethersfield, Connecticut
Client: Hughes Brothers
Date: 2004

O'Reilly, Talbot & Okun Associates, Inc. (OTO) assisted the seller of a former gasoline service station through sale negotiations and filings for the Connecticut Transfer Act. The site was contaminated with gasoline and petroleum products from various sources associated with the former business. OTO performed Phase I and II site assessments, prepared Connecticut Transfer Act Forms, and designed a fast-track remediation of the site. OTO documented the removal of over 7,000 tons of petroleum contaminated soil from the site and oversaw off-site treatment through asphalt batching.
